## **Technical data sheet**

Service pole, type ISS130130

**Item number: 6289407** 

Aluminium floor-ceiling service pole (surface anodised or powder-coated in RAL 9010) with two 76.5 system openings to accept device installation sockets of the 71GD series.

The service pole is fitted with an internal clamping device, which enables convenient tensioning between floor and ceiling. An extendable telescope provides a clamping range of 3,015–4,500 mm. Cables can be inserted both through the telescopic square pipe and directly into the main profile from below or above.

The installation area for switching and connection devices depends on the length of the extended telescope, but is at least 1 m per system opening (starting from the ground).

The service pole conforms to the requirements of DIN EN 50085.
